Description: The final requirements of the adopted Pharmacists' Regulations (Cosmetics) were eased since publishing G/TBT/N/ISR/1279, as follows:

- Lowers the particular training requirements for responsible representatives so that in the final Regulations, no special training is required to appoint a person as a responsible representative;
- Adds the possibility to report the composition of the cosmetic product in the notification regarding the marketing of a cosmetic product, also in a range of concentrations and not in an exact concentration;
- Lowers the particular requirements regarding the proper storage and transportation of cosmetic products;
- Deletes the special requirements for marking special warnings of cosmetic products;

¹ This information can be provided by including a website address, a pdf attachment, or other information on where the text of the final/modified measure and/or interpretive guidance can be obtained.

- Amends the regulations so that the requirement to mark the product according to the regulations applies to the outer or the inner packaging.
